

## **The Consciousness Shift From Nothing to Nothing**

*It might be interesting to recall that when we use the term "evolution" we are referring to a process of Life motion out of the goal of a previous process of motion we call Involution.*

### **EVOLUTION**

At this point, billions of Humans are automatically receiving totally formless or "abstract" mental impressions through notime intuitive connections with the higher non-dense plains of Energy. They are then processing these impressions, also frequently in notime, into useable thoughtforms for resolving problems and issues in accordance with group conscious values within the service area of their particular present incarnation. Many, probably most, do this quite naturally. They are not aware of the Science involved or, for the most part, of the fact that this function is, although eventual, the unavoidable result of numerous incarnations as a separative selfconscious animal man evolving into a Group Conscious Human Being.

To use some scientific language, this natural evolutionary human process is the **eventual** result of an initial Revelation one has experienced during one of her or his numerous self conscious incarnations. In that particular incarnation, one, usually suddenly, Real-izes (makes REAL) the fact that one is the Living non-mortal consciousness within one's dense physical body rather than that mortal body! This Revelation generates conscious efforts during the following (who knows how many) incarnations to shift the deluded assumption of being one's mortal, dense physical body to that realization.

The shift occurs in the focus of the consciousness. Initially, basically polarized in the emotional body, individuals identified their selves as being totally separated dense physical bodies. They were driven by desire and the fear of death. Intelligence which was evolved to its pinnacle in the First Solar System is naturally used by the individual to attempt to avoid death and to get whatever is desired. Power and the willingness to use it to get whatever one desired—whatever one needed, or wanted—was the determinator of ones position in life. .

You will note that there is no mention of Love in this lash up. Thus for millions of years, this Second Solar System was much like the first. "Certain units of humanity—then existent [the end of the first solar System]—were so completely conditioned by these material principles (the Principles of Involution) and so deliberately unready for moving on to the comprehension of another set of principles (more expressive of the divine nature) that they remained of "fixed and selfish material purpose" and a planned distortion of the divine will was intelligently created by them." *Rays and Initiations P. 350* It is through this delusion, created and fostered by the forces of Retrogression, which Love had to evolve.

Hence, Evolution. Over the incarnations on the Path of Revelation, as the individual units of consciousness Real-ize, that is, start to organize and live the current dense physical incarnation in harmony with Science, with the Laws of Cosmos, the polarity of the consciousness shifts from an astral/ emotional-mental focus, (which is the basic focus of the Animal Kingdom and Animal-Man) to a mental-buddhic focus. This focus shifts the driving force of life from desire or the astral/emotional-mental polarity to Love or the mental-buddhic focus, or you might say from the stomach to the heart!

On this planet, as outlined above, that focus involves the necessity for the individual to establish an energy link between the Principles or Laws of Science which drive the creation of the Planet and the higher mind, the formless world of Ideas, as opposed to the lower mind which is the world of thoughtforms. This energy link is anciently called the "antahkarana". It is this energy link which establishes and maintains what is called Intuition for the notime processing of Love.

Many, many, in fact billions of the presently incarnated units of consciousness have over their many incarnations established this linkage.

Individuals who have evolved to this point of conscious awareness are not affected by the non-stop screaming and raging appeals to hate and fear that have been filling, to an extraordinary level, both the lower mental and emotional planes of human intercourse over the past 6 years. These ravings are obviously the terrified death throes of our separative selfconscious sisters and brothers who remain identified with their dense physical bodies. These sisters and brothers largely deserve understanding and love. As we all know from deep experience, evolving from the identification of being a separated individuals to the realization of being an immortal unit of Consciousness is a very difficult, to say the least, Path.

But, Just to focus on the United States: Over these past 65 years the population of the U.S. has doubled from 165 million to 330 million. And specifically, in just the last 40 years the U.S. population has increased by 103 million. Given the impetus of the expanding Aquarian Age and the thrust of the unavoidable wave of Human evolution one could say with some sense of accuracy that a large portion of those incarnating units of consciousness were born Group Conscious. That is they have over many previous incarnations developed this level of consciousness, and it is now their instinctual or natural focus.

Let us not confuse the concept of group consciousness with the meaning we use in our delusional one dimensional reality. Here, it is simply the delusion of separation on a larger scale. It has cut the incredible diversity of the forms of groups (including many "spiritual/esoteric" groups) of the One Humanity into millions of mostly warring groups or tribes. However, as we pass through our incarnations we gradually realize the fact that rather than being one's dense physical, mortal body one is in fact a unit of Living consciousness focused within the dense body. As we become more and more that

Consciousness, we are able to simultaneously recognize our absolute dense physical Unique Individuality and our Synthetic Oneness, not only with one another but with Life.

Test. If we happen to be at a level of say 9000 feet, on a clear night we can actually see with the “naked” eye an uncountable number of stars. They are a really tiny part of the Milky Way, the galaxy that contains our rather smallish Solar System. We have a revelation, a comprehension. That’s Us!

When I have fears that I may cease to be  
Before my pen has gleaned my teeming brain,  
Before high-pilèd books, in charactery,  
Hold like rich garners the full ripened grain;  
When I behold, upon the night’s starred face,  
Huge cloudy symbols of a high romance,  
And think that I may never live to trace  
Their shadows with the magic hand of chance;  
And when I feel, fair creature of an hour,  
That I shall never look upon thee more,  
Never have relish in the faery power  
Of unreflecting love—then on the shore  
Of the wide world I stand alone, and think  
Till love and fame to nothingness do sink.  
John Keats circa 1822

And later recall that our galaxy is a rather small one as galaxies go.

As this revelation is gradually accepted as Reality, the focus of Living shifts from the fear of death, from the delusion of being separated from and at war with everyone and everything to the wonder of being an immortal part of virtually EVERYTHING. We shift from being basically insane, fear and hate driven consumers and hoarders of Energy (\$\$\$ and stuff which are simply dense manifestations of energy) to being Directors of energy.

And, just what energy are we directing? We realize that the thoughtforms, the words, which our forerunner Brothers and Sisters used to manifest our Constitution are not just words, but the names of Cosmic Energies which create and maintain all Life in the infinite Cosmos including this living planet and all of the living forms of Life in and on it.

**Harmony, Equality, Justice, Truth, Liberty, Joy—without these frequencies there can be no coherent forms.**

There would be no Solar Systems or Suns or Planets without these Principles of Life. In this solar system Venus is not planning to kill the Earth and take over Jupiter. The millions and millions, probably billions of unique variations of the forms that Life assumes in the Plant Kingdom are not in competition with each other. Nor is the Plant Kingdom at war with the Mineral Kingdom, which is the densest manifestation of Energy on the planet and also has millions and millions if not billions of forms.

In the Real World we are a Synthesis of three or the One.
